Rashmi PG
Full Stack Developer(Angular+ Java)

Highly skilled Angular and Java Developer with extensive experience of 2.4 years in designing, developing, and maintaining web and mobile applications. Proficient in front-end and back-end technologies with a strong background in software development principles and best practices. Proven track record in agile environments and collaboration with cross-functional teams to deliver high-quality software solutions.

Experience

- **Associate Software Engineer**
Carelon Global Solutions Bengaluru
Nov 2021 - Mar 2024
 - Worked in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives.
 - Contributed to the development of scalable web applications using Angular for the front-end and Spring Boot for the back-end.
 - Implemented responsive and user-friendly UI components using Angular, HTML5, and CSS3.
 - Integrated RESTful APIs to communicate with back-end services, ensuring seamless data flow and synchronization.
 - Executed unit and integration tests using Jasmine, Karma, JUnit, and Mockito to ensure code quality and functionality.
 - Worked on designing and implementing RESTful web services using SpringBoot.
 - Utilized Hibernate and JPA for database interactions, ensuring efficient data retrieval and manipulation.
 - Collaborated closely with cross-functional teams, including designers, product managers, and QA engineers, to deliver high-quality software solutions.
 - Utilized Git for version control and collaboration on codebases.
 - Leveraged GitHub Copilot for code suggestions and completions. - Utilized Copilot to explore and implement new coding techniques and best practices, enhancing code quality and maintainability.
 - Used JIRA for task tracking and project management.
